

Voice123 x ElevenLabs

Voice123 and ElevenLabs have teamed up to let you showcase ElevenLabs-powered AI voices directly on your Voice123 profile. Keep using your real voice in your everyday work, and let your ElevenLabs voices tap into new opportunities with AI-focused clients!

How it works:

- 1 Follow the instructions [here](#) to get your ElevenLabs account set up for free.
- 2 Create a Professional Voice Clone on the ElevenLabs platform and [share it in the Voice Library](#), where you can earn rewards* for usage of your voice on terms you set.
- 3 To display your shared ElevenLabs voices on your Voice123 profile, copy the sharing link for your voice and email it to help@voice123.com.

*See our [Payouts docs](#) to check if Stripe Connect is supported in your country.

Self-serve

Only 30 minutes of audio needed to create an ultra-realistic AI voice using Professional Voice Cloning

Share on your terms

Set your rate in \$ per 1,000 characters and add extra features like live content moderation

Weekly Payouts

Track your voice usage and earnings in your ElevenLabs account, and get weekly cash payouts via Stripe Connect

FAQs

Why do I need an AI voice?

Sharing your ElevenLabs-powered AI voice on your Voice123 profile helps you expand your earnings potential on both platforms:

- Voice123: allow potential customers to demo your AI voice for instant auditions
- ElevenLabs: let your AI voice generate passive income in the Voice Library!

Will my AI voice sound like me?

Yes! Our Professional Voice Cloning (PVC) technology creates an ultra-realistic AI version of your voice. To create a great PVC, you should upload at least 30 mins of professionally recorded audio for the style of voice you'd like to create. For the best results, follow [this guide](#).

How much will I earn for usage of my AI voice?

You can set your own Custom Rate in \$ per 1,000 characters (up to \$0.2) or choose our Default Rate. Please see the [Voice Library Addendum section of our Terms of Service](#) for more details.

Can I control what my voice is used for?

We offer a "Live Moderation" feature you can activate for your voice that is intended to stop users from generating content that belongs to a few prohibited categories. We also carry out regular content moderation practices.

We do not currently offer a way for you to prevent specific brands or companies from using your voice, or to prevent your voice from being used for specific categories of content like advertisements. Please see our [Terms of Service](#) for more information.

Can I stay anonymous?

Yes! You can use your own name to build your brand or choose a different name for anonymity.
